Internal Corrosion for Pipeline - Basic  
February 22-26, 2016 Edmonton, AB Canada

This course was designed to provide students with the fundamentals of implementing, monitoring, and maintaining an internal corrosion control program as part of an overall Pipeline Integrity Management program. It is an introductory level course focusing on internal corrosion of liquid and natural gas pipelines used for transmissions, storage, and gathering systems. The course combines lecture, hands-on field testing and case studies. The course concludes with both a written and practical examination. The practical examination includes OQ Covered Task Assessments for the following tasks: (1) Insert and remove internal corrosion coupons, (2) Measurement of corroded area and pit depth measurement (with pit gauge), (3) Measure wall thickness using handheld ultrasonic meter. NACE is recognized as an Authorized Provider of Continuing Education Units by the International Association for Continuing Education and Training (IACET). To receive CEUs, participants are required to be engaged in the entire course and successfully pass the final exam. At the conclusion of the course you will be asked to complete a course evaluation.
